# MD-RUGGED

Mobile Forensics Rugged Package of MD-NEXT/MD-RED for the Frontline Investigators

MD-RUGGED is All-In-One mobile forensics package for the investigation at the field. Laptop is preinstalled with data extraction solution MD-NEXT and analysis tool MD-RED. Evidence data at the crime scene can be investigated at the laboratory level and other necessary components can be customized as a rugged package. MD-RUGGED enables forensics investigators to set up a mobile forensics control tower at the very spot where the accident took place.
